

Claims

1. A container cover comprising:
a cover plate having a rear surface for contacting a container; and
5 an annular closing member having a peripheral portion fixed to the cover plate
along a rear peripheral portion of the cover plate and a remaining portion for detachably
and resiliently contacting the rear surface of the cover plate.

2. The container cover according to claim 1, wherein the peripheral portion
10 of the closing member is extended to a side end or a surface periphery of the cover plate
and fixed thereto.

3. A container cover comprising:
a cover plate having a rear surface for contacting a container; and
15 a closing member having a fixing portion fixed to the cover plate along a
peripheral portion of a surface of the cover plate and an annular contact portion bent from
the fixing portion toward the surface and extending integrally therefrom.

4. A container cover comprising:
20 a cover plate contacting a container at its back surface; and
a closing member having at least a pair of fixing portions fitted on the cover plate
along a peripheral portion of a surface of the cover plate and an annular contact portion
bent from the fixing portion toward the surface and extending integrally therefrom.

25 5. The container cover according to claim 3 or 4, wherein the cover plate has a
round formed at a side end of the cover plate along its lower peripheral portion.

6. The container cover according to claim 3 or 4, wherein the cover plate
has a ball-shaped press protrusion formed at the contact portion along its end contacting
30 the container.

7. The container cover according to any one of precedent claims 1 to 4,
wherein the closing member is made of silicone.

35 8. The container cover according to any one of precedent claims 1 to 4,

PCT/KR2004/002163

RO/KR 17.09.2004

wherein the cover plate is made of one selected from the group consisting of polycarbonate, polyethylene, polyvinyl chloride (PVC) and acryl.
